

ABOUT THE COMPANY

Invaya is a provider of software and hardware solutions and services, specializing in embedded systems. Invaya provides global technology and business services, with industry-specific expertise in broadband communication, wireless, and media processing systems. Our services and products designed to help clients improve competitiveness and efficiency.

Outsourcing and Fixed-Price Projects

Invaya suggests flexible outsourcing models for projects, supporting its customers challenges and business needs. By applying solid combination of deep industry specific knowledge and proven project management capabilities Invaya helps its customers to optimize time to market and minimize development risks.

Onsite and Offshore Projects

Invaya prides itself in the established workflow processes, both with off-shore development and with onsite management and deployment. Invaya's professional services span over development, testing, system engineering and projects management.

Our Mission

Our mission is to leverage our expertise to the benefit of our customers and partners through high levels of integrity, positive and creative approach.

Invaya is a privately-held company, Headquartered in Israel.
